Hello,

The module is installed like any other J! extension. You can read about installation process here. Tutorial how to use the module can be found in "Description" field on module settings page.

Hello,

Thankyou very much for your quick response I did installed like other modules but my images are not showing up when I am executing the module. I am trying to put my joomla directory path for the images But I am not able to run this module successfully.

Thanks

Provide a link to a page where we can see described problem and screenshot(s) of module settings page by email. It can be a conflict with a 3rd party extension or the module is configured incorrectly.
