
can not link images to other pages

Posted by preksha - 2012/04/22 16:30

my carousel works but does not link it to other pages on clicking. I've tried almost everything I've seen in the forums.

link:

<http://getmywidget.co.cc/>

can someone please help?

Hello,

INI file with links and descriptions should be located in folder with images. In your case it is Joomla! root folder.

Regards,
ARI Soft

they all are already in the same folder.

INI file being:

```
learn10.jpg="learn"
bbc_news.jpg="bbc news"
trivia_pursuit_blitz.jpg="trivia pursuit blitz"
mini_piano.jpg="mini piano"
tv_guide.jpg="tv guide"
```

```
learn10.jpg="learn"
bbc_news.jpg="bbc news"
trivia_pursuit_blitz.jpg="trivia pursuit blitz"
mini_piano.jpg="mini piano"
tv_guide.jpg="tv guide"
```

```
learn10.jpg="http://getmywidget.co.cc/gmw/index.php?option=com_jdownloads&Itemid=4&view=viewdownload&catid=8&cid=10"
```

```
bbc_news.jpg="http://getmywidget.co.cc/index.php?option=com_jdownloads&Itemid=4&view=viewdownload&catid=5&cid=7"
```

```
trivia_pursuit_blitz.jpg="http://getmywidget.co.cc/index.php?option=com_jdownloads&Itemid=4&view=viewdownload&catid=7&cid=8"
```

```
mini_piano.jpg="http://hpearth.com/gmw/index.php?option=com_jdownloads&Itemid=4&view=viewdownload&catid=3&cid=11"
```

```
tv_guide.jpg="http://getmywidget.co.cc/index.php?option=com_jdownloads&Itemid=4&view=viewdownload&catid=4&cid=9"
```

Re:can not link images to other pages

Provide a link to INI file.

Regards,
ARI Soft

Re:can not link images to other pages

Posted by preksha - 2012/04/22 19:21

getmywidget/gmw/modules/mod_aricloudcarousel

Re:can not link images to other pages

Posted by admin - 2012/04/22 19:22

You load images from Joomla! root folder, not from module folder so place INI file to Joomla! root folder.

Regards,
ARI Soft

didn't work.

Re:can not link images to other pages

Posted by admin - 2012/04/22 19:50

We can investigate an issue if you provide a temporary access to your J! backend by email

Regards,
ARI Soft

I found the same problem but I don't understand your solution to fix. In my case in localhost works well. The problem gets out on-line.

<http://nodomain7d220ae8-837.linux.kolst.it/joomla/index.php/en/projects>

thanks

To Cassone, image names are case-sensitive. Your image files has .jpg file extension, not .JPG. Fix it in INI files.

Regards,
ARI Soft

It is pretty simple once you understand the Instructions. The instruction given on the Module are not that clear. Here it is... Once you create the .INI file as described,you have to upload it on the server in the same location where the currant .INI file is located after that you have to change your "Description file" to what ever name .INI file you created. Meaning if it is" aricloudcarousel.ini "you have to change it to XXXX.ini"your file name"..

Hope this makes it a little better to understand.
