ini file type not supported...? (solved)

Posted by shulbert - 2012/04/22 20:16

_____

when i try to upload my .ini file into the folder with my images for the cloud carousel, it just reports .ini file type not supported...? how can i fix this? thnaks in advance - steve h

i used FTP to upload and it now works fine!!

_____

Hello,

You can upload it with help of a file manager Joomla! extension. For example eXtplorer.

Regards,
ARI Soft
