How to link to thumbnail images not using carousel

Posted by tday - 2012/04/23 21:53

_____

Carousel seems to be working very nicely and I want to link to the thumbnail images that are automatically generated.

Where are they stored in the Joomla directory structure?

Thanks in advance!

_____

Hello,

The module stores auto-generated thumbnails to /cache/ folder or to /cache/mod_aricloudcarousel/ folder.

Regards,
ARI Soft
