
Straight Vertical Line Instead of Carousel

Posted by jodaki84 - 2012/05/10 00:29

I got everything loaded and the images appear in a straight vertical line instead of in the Carousel.

You can see it here

Please help me figure out what happened here.

Hello,

/modules/mod_aricloudcarousel/mod_aricloudcarousel/js/themes/default/style.css file can't be loaded. 403 HTTP error occurs. It can be a problem with file permissions. Check file permissions for the file in all files in /modules/mod_aricloudcarousel/mod_aricloudcarousel/js/themes/default/ folder and sub-folders.

Regards,
ARI Soft

Thank you, it worked very well once I reset the permissions in Joomla. I am not sure how they got screwed up in the first place.
