
Two on same page

Posted by jodaki84 - 2012/05/22 20:32

I am trying to run two instances of the cloud carousel on the same page on the website I am trying to create. The problem page is <http://www.davidrleitch.org/reading/index.php/previous-years/2007>.

The second instance just appears as blue dots like it is loading, but it never does. I can't seem to figure out what is wrong with it, as I used the same procedure to do the 2010 and 2011 pages that exist on the same website and they work just fine with two instances of the cloud carousel on the same page.

Can somebody help?

Hello,

It seems this is a problem with "Smart Load" feature of your site template.

Regards,
ARI Soft
