
Syntax Error for .ini file

Posted by 08vankim - 2012/06/21 08:48

Hi

I want to link each thumbnail to an external link. I have edited the aricloudcarousel.ini file to look as follows (excerpt):

```
twitter.png="Twitter"
```

```
twitter.png="Twitter"
```

```
twitter.png="http://www.twitter.com"
```

The .ini file is in the folder with my images (images/links), and the description file parameter is "aricloudcarousel.ini". I have set:

Lightbox Integration "none"

Link Target "new window"

Bring to Front "yes"

Only Open Active Item "yes"

I am using thumbnails and have set:

Ignore Original Images "no"

However, the thumbnails in the carousel link back to the original image and open in a new window, without the external link taking effect.

Also, as soon as I placed the .ini file in the folder with my images, I got the following syntax error:

Warning: syntax error, unexpected \$end in C:\xampp\htdocs\wendy\images\links\aricloudcarousel.ini on line 8 in C:\xampp\htdocs\modules\mod_aricloudcarousel\mod_aricloudcarousel\kernel\Utils\class.AppUtils.php on line 35

I checked line 35 of the class.AppUtils.php file and it is:

```
? parse_ini_file($filePath, true, INI_SCANNER_RAW)
```

As you can see I'm working on a local host, so can't direct you to the site.

I await your speedy response, please let me know if you need more information.

Thanks

=====

Hello,

Upgrade the module to the latest version.

Regards,
ARI Soft

facepalm

Thank you! Sigh... it's always the simplest fix that takes the longest to realise! All working.
