Carousel: Image folder not found

Posted by feu_ari - 2012/07/13 14:53

_____

Hi there,

I've just installed ARI-Carousel and Sexy Lightbox and have some questions
- I created a folder /images/slides/slideshow1, but the system told me this would not be a folder. The only folder I can use is "images". I checked the acess rights and they are ok.
- How can I change the background of the carousel (only with my module background, or is there another way)

Perhaps anyone can help me.

Best regards feu_ari

_____

Hello,

1. Set "Image path" parameter to images/slides/slideshow1 value.

2. Enter a link to a background image in "Path to background image" parameter.

Regards,
ARI Soft

_____

Hi,

#1: that's what I have made. But the system tod me: this is not a folder - but definitely it is.
#2: thank you, I will try that

I even tried to change the size of the lightbox, but whatever value I type in the shown picture is very small.
Is it correct that there is only a plugin "System - ARI Sey lightbox"

Best regards

_____

1. Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate it?

2. Where we can see the problem with the lightbox?

_____

I uninstalled and reinstalled the software. Now everything works fine. No idea why the first try failed.

Nevertheless I will give you the link: http://cae-digest.de/index.php/wuehlkiste/slideshow-1.html
It's just a first test, but as you will see the rotation of the pictures is very unsteady. Is there a way to make it work smoother (have I to reduce the picture size)?

Best regards

_____

Decrease value of "Speed" parameter, for example try to set it to 0.05 value.
