Module only loads first image

Posted by ninjaprecision - 2012/07/24 19:19

_____

Hi,

Up until recently the module has been working properly, but now it only seems to draw the first image (of 4) unless the page is reloaded with the module position in view (normally it has to be scrolled down to.) Any idea why this might be happening?

You can see it happening at www.ninjaprecision.com

_____

Hello,

Try to disable smart load feature in site template settings.

Regards,
ARI Soft
