
Custom Thumbnails

Posted by camvet - 2012/09/20 16:14

I've been tried unsuccessfully to setup custom thumbnails to go with my carousel. I have the following directory structure:

images
images/iphone

Hello,

Provide a link to a page where we can see the carousel.

Regards,
ARI Soft

I'd love to, but it is not visible to the web yet, because of some legal issues. I would have to put you under a non disclosure agreement to see it. Are my settings actually correct for what I am trying to do?

Settings look normal, thumbnails should have the same file names as original images.

PS: You can install new instance of Joomla!, reproduce the problem on it (you can use fake images) and provide a link to a page where we can see it.

Regards,
ARI Soft

Thanks, that was it, I had a typo that I cut and paste into all my filenames. It's working great now!
