## Images not showing at all

Posted by madelharri - 2012/11/07 17:02

---

I've just installed the module and set it up, I think correctly, but I can't get it to display any images in either firefox or chrome, I've not tried IE. The link is <http://contract.euroserviceslimited.co.uk> to take a look and I've uploaded an image below.

Any help gratefully accepted. <http://www.ari-soft.com/images/fbfiles/images/Publication1.jpg>

Hello,

It seems this problem with extension which is used on your site to combine javascript files and optimize loading. jQuery library which is required by the module is not loaded. We can investigate the problem in more details if you provide a temporary access to your J! backend by email.

Regards,  
ARI Soft

Hi, I've decided to change the template which seemed to be the thing that was giving the problem. I've now got it working.

Thanks for your help.
