
Adding image Background

Posted by davidator - 2012/12/22 20:12

Hello and thank you for this awesome Module!

I want to add an image. Png with a z-index specific because I want the image to be at the center of the gallery and the thumbnails revolve around this central image

I think I need to edit the style.css file, but I can not find the right way to do

Maybe someone can help me find the right way to

cordially

David

Hello,

The module uses \modules\mod_aricloudcarousel\mod_aricloudcarousel\js\themes\default\style.css CSS file, you can modify it for your needs. It is also possible to add custom CSS rules to "CSS Styles" parameter in module settings.

Regards,

ARI Soft

I did it in line11

```
.ari-cloud-carousel-wrapper {  
background: url(images/dancer.png) no-repeat center center;  
position: relative;  
margin: 0 auto;  
z-index: 99;  
}
```

but i think its not the good way! My "dancer" is behind thumbnails

there isn't really a problem with your module, i just want to know which php file i can add a new class to do what i want
customize

Hi,

I'm new here.

I have the same problem.

How can I place a logo on the center. Any solution?

I use the code on style.css but I didn't see the logo.

Please help. Thank you...

Hello,

Use "Path to background image" parameter for this purpose. For example if want to use /images/bg.jpg image as a background image, populate the parameter with the following value:

images/bg.jpg

Ok. That's the solution but how can I resize the dimension and fixed it in the center?
The logo is enlarged in the height and width...

Could you provide a link to a page with the carousel?

Regards,
ARI Soft

Try to add the following code to "CSS Styles" parameter in module settings:

```
BODY .ari-cloud-carousel-wrapper.ari-cloud-carousel-responsive {  
    background-size: auto !important;  
}
```
