newbie: ACC installed but does not show up at all

Posted by Emil - 2012/12/26 17:48

_____

Hi, I am a complete newbie to Joomla and ACC, installed both, uploaded a few images (png) and set some options (including jQuery local, image path: "images/Speedport" and Number of images 3")

But nothing comes up:

http://www......com/Joomla/

did I miss any basic setting?

Thanks,
Emil

_____

Hello,

It seems this problem with site template. If you open browser's error console, you can see it contains javascript error which is not related to "ARI Cloud Carousel" but it prevents execution of "ARI Cloud Carousel" javascript code:

 http://www.ari-soft.com/images/fbfiles/images/error-d67d0740b7c218a06fa77c1d29cf743a.jpg

Regards,
ARI Soft

_____

Thanks, I will Start debuging ... I only installed Professional Template, Modules ... it die not Coke to my mind, that some Code could be the problem.

Next Time I will Check that First - Sorry for the stupid question...
