
Please help cannot get ini file to work

Posted by hannah - 2013/02/17 09:13

Hi I followed the instructions: my ini file is placed in the images folder but no matter what I do I cannot get titles, descriptions and links to work. Your example ini is placed within the module so now maybe a really dumb question: do the images folder have to be placed in the module itself? thanks

Hello,

Probably your INI file has an incorrect format. Send a link to a page where we can see the carousel and a link to INI file so we can investigate the problem.

Regards,
ARI Soft

Hi,
I got it to work I just had some "" missing in the INI
but now: I need to show FLV and MP3 in the ARI Fancybox from the carousel. How would the link be if I have xx.flv in the directory /images/videos and my carousel images & INI are in images/carousel? Can you please give an example and also what parameter I have to set for Fancy box in plugins and /or module?
Thanks so much

Hello,

"ARI Fancybox" can't show FLV or MP3 files directly into the lightbox. It is possible to load FLV or MP3 file into an article with help of AllVideos (or other similar plugin) and then load the article into the lightbox.

Regards,
ARI Soft
