## do not show on mac

Posted by larsvildgaard - 2013/02/20 21:25

---

Hi there.

I got a find carousel going on when i look at my homepage on a pc, any browser, but on mac it just not show.. its only the mac "thinking weel" going on ?? please help.. I got the new java installed and enable on my mac.. ??

Can any one please tell what to do.

Thanks.  
Lars

Hello,

Where we can see the problem?

the site is not done yet at all, but my problem on mac is on this site.  
<http://eyecandyteam.dk/index.php/sample-sites/find-eyecandy>

Thanks for helping.

This problem with HTML code which is used around the carousel. Remove and tags which wrap the carousel.

Thank you very much - i will try that, when i am on my mac later. i used a load module for this page, and it seems like it wrapped it some hov. it says raw output now, so hopefully it helps. Thanks - Lars

It doesn't require a Mac to reproduce the problem. It can be reproduced on PC using Google Chrome or Safari browser.
