Module working fine except the carousel

Posted by ricardovilar5 - 2013/02/23 00:10
_____

Hello,

a) I've successfully installed the module ari carousel and ari sexy lightbox, I have curretly got 3 images but not as a carousel, for some reason the module is setting them vertically behind one another without rotating as a "3d" carousel. How can I set them as a carousel?

b) I have purchased the Ari sexy lightbox as an attempt to integrate it with the carousel but have been unsuccessful to create the click in feature. How do I integrate these 2 great modules?

Thanks in advance,
r

Hello,

1. Where we can see the problem?

2. Install "ARI Sexy Lightbox" module then install, configure and enable "System - ARI Sexy Lightbox" plugin. Open "ARI Cloud Carousel" module settings page and set "Lightbox integration" parameter to "ARI Sexy Lightbox". That's all.

Regards,
ARI Soft

_____

I took down the security page, You should be able to open it now.

Thanks,

_____

Thank you,

Regarding the click in feature, how is that activated?

_____

Sure,

going about your example module but instead I'm trying to make it possible to click in the carousel images and then it links you to either another page (article).

is that possible?

thanks in advance,
r

_____

Links can be defined in INI file. You can find a link to a sample INI file and instruction how to use it in "Description" section on module settings page.

_____

Ok, Thank you so much!! however, I went over the example but my images are still not click-able, how do you make them click-able?

Thanks in advance,

_____

Im so sorry, its possible to open it again: http://vilar.co/index.php/services/equip

Im just trying to make my images click-in-able with a link to a new article-page

thanks in advance,

_____

An incorrect file name is used in INI file. It should be Red.jpg instead of red.jpg

Regards.
