
images not showing

Posted by sylbestros - 2013/03/17 18:04

Trying to give path to images but not sure what is going on .
The module seems to work but no images are displaying.

Gave image path like this : /var/www/vhosts/paulopetri.gr/httpdocs/images/phocagallery

thanks in advantage .

Hello,

Set "Image path" parameter to images/phocagallery value.

One more question if possible. is it possible to use the module as a header ?

If your site template provides a module position for header, you can load the module into this position.
