
Ari Cloud + Ari Sexy Lightbox

Posted by webdesko - 2013/03/28 13:56

Hello,

1.

Is there a possibility to add special Ari sexy lightbox to the Cloud Carousel so it pop up other thing than pictures from the path of Ari Cloud Carousel.

I would like to have 10 image roatating - but every image after click have to pop up the ari sexy lightbox pop up with information.

2.

How to set up another image pop up on Ari cloud carousel? I mean I would like to have pictures rotating from path x but the photo that pop up from path y.

Best regards

=====

Hello,

1. It is possible to show another image, a video or external page. Links can be defined in INI file. A link to a sample INI file can be found in "Description" section on "ARI Cloud Carousel" module settings page.

2. The extension doesn't support this ability.

1. Ok - how exactly I have to setup in the INI file? For exemple image1.jpg link to pop up image2.jpg ?

2. And if I use another path for thumbails and another for images?

1. See section in sample INI file.

2. If you want to use your own thumbnails, you can specify path to thumbnails in "Thumbnails path" parameter in module settings.

Hey,

2. I did so but it didn't do the right thing. I mean - I have one path folder with mini pictures - I add the Thumbnails path and I have bigger image that I add to Image path. But pictures come on the carousel from the image path.

SET:
Use thumbnails Yes
Ignore original images No

Send a link to a page where we can see the problem and screenshot(s) of module settings page by email.
