
aricloudcarousel.ini as variable

Posted by carbar - 2013/05/29 05:39

Hi,

I'd like to use the ARI Cloud Carousel module for advertising different product groups depending on categories if possible.

Is there a trick to set Image paths as parameters thus launching different Description file depending on category, article, etc.

Thanks :blush:

Hello,

If you want to load "ARI Cloud Carousel" module into an article (or other content) and change some module parameter, it is possible to use "Modules Anywhere" or "Module Plant" plugin. You can read about it [here](#).

Regards,
ARI Soft
