
How to align centre bottom the description + title

Posted by interceptor - 2013/06/01 18:57

This should be easy, but i can't seem to get CSS code in the module to center bottom align the title/description of the images as per ini file.

This is the ideal location for the active icon/image, rather than being to one side.

Any help would be appreciated.

Thank you.

Hello,

Add the following code to "CSS Styles" parameter in module settings:

```
{ $id }_wrapper .ari-cloud-carousel-caption
{
  top: 98%;
  width: 100%;
}
```

```
{ $id }_wrapper .ari-cloud-carousel-title,
{ $id }_wrapper .ari-cloud-carousel-alt
{
  text-align: center;
}
```

Hi, unfortunately using this code still results in the text remaining in the top left corner.
Any alternative ideas?
Thanks.

The code works fine for us. Where we can see the carousel?

You entered incorrect code in "CSS Styles" parameter. It without {\$id}.

Perfect!!!

Just to inform you, i copied the code from the email notification received. For some reason the email did not display the {xx} text.

I have now copied it all from the forum and it works well.

Thanks for providing support on a Sunday!
