
Images not showing

Posted by tima - 2013/06/06 07:01

Howdy Forum,

I have looked at many posts entitled with similar heading, but I cannot work out the issue.

I am using J2.5.11 and when I try to display images I get the following

<http://www.library.kiama.nsw.gov.au/newlibrary/index.php/2012-06-19-05-08-58/for-students>

I am using local jquery and am sure I am pointing at the correct directory. I have changed settings to try and make it work, but no luck.

Any assistance would be gratefully accepted.

Thanks for your time

Hello,

Open browser's error console. You can see it contains javascript errors. It seems this problem with extension which are used to load jQuery library. It loads the library incorrectly.

Regards,
ARI Soft
