thumbnails size based on height and with original

Posted by Joubert - 2013/07/11 15:41

_____

Hi,
I would like to have thumbnails size based on height and width original,
is it possible ?
so far when I mixe portrait and landscape format, I get an unique format...
Thank you
Dominique

_____

Hello,

You can define only "Thumbnail width" or "Thumbnail height" parameter, the second parameter will be calculated automatically.

Regards,
ARI Soft

Hi,
Thank you for answering so quickly,
Actually, I tried that, but all the images have the height I defined, and all the same width that I didn't defined ...
Maybe I missed something else ?
Thank you to help
Regards
Dominique

_____

Send a link to a page where we can see the carousel and screenshot(s) of module settings page by email.

Regards,
ARI Soft

Hi,
Sorry not to have replied sooner. I am quite busy on another site ...
actually, my issue is on a local site so far.
I will try to test on a live site and if still an issue, I will provide you an access.

Best regards
Dominique
