
reflection displaced 15px to the left

First, this extension is visually brilliant. It works so well and the number of configuration parameters is beyond belief!

There is one very minor oddity and that is the reflection - it is displaced to the left (see attached image) or see the effect direct at <http://morte-family.co.uk/index.php/family-tree>

Is this a known bug or is it unique to my installation?

Thanks,

Hello,

This problem with site template styles. Add the following CSS rule to a site template CSS file or to "CSS Styles" parameter in module settings:

```
.ari-cloud-carousel IMG.cloudcarousel
{
border-style: none;
margin: 0;
}
```

Regards,
