
Carousel not centered

Posted by xoco - 2013/09/04 22:04

Hi,

In my page : <http://www.atokokolli.org/cappiello.fr>
My carousel is not centered.
It is more important in small devices like android or Ipad.
How should I fix it???

Tx for this great module !

Hello,

The page doesn't contain "ARI Cloud Carousel" module.

This problem with site template styles. You can add the following CSS rule to remove padding which are added by site template:

```
.uk-width-1-1 .uk-panel-box,  
.uk-width-1-1  
{  
padding: 0 !important;  
}
```

Tx I guess it works!
I've another withespace in the top of the component, do you know how should I do to remove it?
Thank you very much !

I had already read it, but I don't see well what should I change.

I tried to change Ypos and Y radius, but right now it is perfect for the proportions of the carousel, I don t want to change it again.

It is impossible to get rid of the whitespace without changing those values???

Right now my config is:

width:1130px

height:800px

X radius : 500

Y radius : 260

X pos :0

Y pos :0

Thanks !

Increase value of "Y radius" parameter.
