
Form Checkbox - rotate if checkbox checked

Posted by ZAJDAN - 2013/09/20 21:04

Helo,
I have the idea:
make a form, where will be used checkbox. If checkbox will be checked, carousel will rotate to selected picture which will be mapped to the checkbox. Is it somehow possible?
thanx

Hello,

It can be done as a custom development.

ok...
I attempt but so far unsuccessfully:

```
if ($("#myCheck").is(":checked")) {  
    $('#acc_174 > div:nth-child(1) > img:nth-child(1)').click();  
}
```

Ok...for this case I have made test website:
http://193.165.148.74/test_joomla3/index.php/test

where I use:

```
$( document ).ready(function() {  
if ($("#picture1").is(":checked")) { $('#acc_87.ari-cloud-carousel > div.ari-cloud-carousel-iwrapper > img.cloudcarousel:nth-child(2)').click(); };  
});
```

Use the following javascript code to emulate click by a carousel image:

```
(window || jQuery)('#acc_87.ari-cloud-carousel > div.ari-cloud-carousel-iwrapper > img.cloudcarousel:nth-child(2)').click();
```

so far nothing...maybe I do something wrongly
please if You can look on the website
http://193.165.148.74/test_joomla3/index.php/test
the js is:
templates/protostar/js/form-conditions.js

Your code will executed only once when document is loaded if a radio button is selected and carousel is loaded otherwise it will do nothing.

Regards,
ARI Soft

oh yeeee...
it is true
now it is done ...you can look at it
Thank You a lot...I am very grateful

Re:Form Checkbox - rotate if checkbox checked

Helo,
now I am trying from other side...when will be click on picture make click on checkbox:

first way:
\$('#acc_87.ari-cloud-carousel > div.ari-cloud-carousel-iwrapper > img.cloudcarousel:nth-child(1)').click(function () {
 ('#picture1').click();
})

second way:

```
$('#acc_87.ari-cloud-carousel > div.ari-cloud-carousel-iwrapper > img.cloudcarousel:nth-child(1)').click(function () {
    if ($(this).hasClass('active')) {
        ($('#picture1').click());
    }
})
```

but nothing from that is functional
thank You for help

Use the same jQuery instance which is used for "ARI Cloud Carousel" module.

SOLVED in another way:

```
$('#acc_87.ari-cloud-carousel > div.ari-cloud-carousel-iwrapper > img.cloudcarousel:nth-child(1)').click(function () {
    $('#picture1').attr('checked', 'checked');
})
```

I am sorry I have edit my last post where I say it is Solved:

SOLVED in another way:

```
$('#acc_87.ari-cloud-carousel > div.ari-cloud-carousel-iwrapper > img.cloudcarousel:nth-child(1)').click(function () {
    $('#picture1').attr('checked', 'checked');
})
