
ARI Cloud Carrousel zoom and centered

Posted by perenboom - 2013/10/04 10:26

Hello,

I have installed the Cloud Carrousel but there 2 thing where I haven't found the answer to:
When I click on a picture, it opens in a new screen. Is there a way to change this to zoom?
I have chosen a module position on the left side of the content div but appears sligthly to the right. How can I center this?
Or is there a way to put the carrousel underneath the tekst (like a picture)?

Thanks in advance for your help.

David

Hello,

1. The extension can be integrated with different lightbox extensions. In this case a large image will be shown into a lightbox. See "Lightbox integration" parameter in module settings.

2. Where we can see the carousel?

Regards,
ARI Soft

Thanks, I have found the light boxes.
About the carrousel, this webpages is not yet published so it is not possible to see.

I have put in to pictures to show what I mean

If needed: the template used is Joomspirit30, the module position is user4
When I take a look at the website, it is slightly of to the right.
I have tried other poksitions but with the same result.
Although the strange thing is: when you look at the carrousel, it is as wide as the content div.
The pictures and arrows though are not centered.

Sorry, but we can't investigate the problem by a screenshot. Send a link to a page where we can see it.

Regards,
ARI Soft

I am sorry but I am not able to sent you the url because the website it not launched yet and I can get in personal trouble if I would place the link on the internet.
So the only thing I can give you is the template: Joomspirit30 and the module position: user4

You can create a test site and reproduce the problem on it. A link can be sent by email.
