
Percentage size of module

Posted by ZAJDAN - 2013/11/19 15:06

Hello,
is possible somehow set Percentage size of module?

Hello,

It is possible to use value in percent for "Width" parameter. It will be calculated to absolute value on page load.

Regards,
ARI Soft

thank You for the info
and when the parameter width will be set in percents it will automatically reduce size of images which are contained in the module?
