
Menu freezes on page using page using Carousel

Posted by rossetti - 2014/02/05 18:49

As says in the title

The menu freezes on a site I am upgrading to Joomla 3.2.1 when you click on the page that has the module on it.

Feels like a JQuery conflict but not sure which have tried all the various configurations possible - I think

I am using {loadposition press} trigger to place it where i want it.

Site is located at <http://bobbytench.co.uk/upgrade> and the page where the menu freezes is <http://bobbytench.co.uk/upgrade/index.php/press-reviews> .

Click on press to go there.

Any suggestions welcomed - thanks

Hello,

Set "Load jQuery method" parameter to "Local copy" in module settings.

Did that and set include JQuery to yes
Ver to 1.4.4 and no conflict to No

Still the same :(

Currently the page doesn't contain the module.

OK I was trying another extension

But preferred the look of your one.

Have loaded it in a module position now instead of using the {loadposition position_name} method and it seems to work fine now, no disabling of the menu. Thanks - sorted :)
