# Titles, description & thumbs questions

Posted by VaiNait - 2014/02/19 20:58

_____

Hello!

I have a problem with titles&descriptions. I defined them both in aricloudcarousel.ini and aricloudcarousel.ru-RU.ini files. It doesn't matter if there are cyrillic or latin characters. They does not appear at all. I can see 12 images and 0 titles&descriptions. And at control panel they are switched on.

Also please, can you help me with thumbs? I have my own set of 12 thumbs. Filenames are the same, as the originals, dir's are not. When I specify the path  to thumbs dir nothing happens, I can see only auto generated thumbs.

here is test site: 1.dvspb.com
Please kindly advise and help.
Thanks

Helen

_____

Hello,

Send screenshot(s) of module settings page by email.

Regards,
ARI Soft
