_____

Hei!

How do you upload an ini-file to the folder with the images in Joomla? When I uplad an ini-file, it only says "Can't upload this type of file".

_____

Hello,

If you want to upload it via Joomla! media manager, open "Content - Media Manager" page on Joomla! backend, click by "Options" button in toolbar and add ini extension to "Legal Extensions (File Types)" parameter.

Regards,
ARI Soft
