Responsive problem

Posted by babu1 - 2014/03/01 02:12

_____

Hi to all,

I've a problem with ARI Carousel because if I reduce the browser dimension like a smartphone, the immages go up over the page hiding the text and images on the page as you can see on the screenshot.

Somebody give me a suggestion for solve .

Thanks in advance :) http://www.ari-soft.com/images/fbfiles/images/ARI_Carousel.jpg

_____

Hello,

The extension is not fully responsive. It is only support ability to set "Width" parameter in percent (for example 80%) and then width will be convert to absolute value on page load.

Regards,
ARI Soft

_____

true, but anyway the content(picture) inside the module will be in same size in use any percent of module width

_____

do I understand it good, that in responsive version will be content of wrapper reduced by percent which I will set for the wrapper? or the content will be wrapped to the next line?

===

Re:Responsive problem

_____

Carousel size is adapted to screen size and saving aspect ratio (between "Width" and "Height" which is specified in module settings). You can see the extension in action on demo site. Change size of browser window to see how it works.

Regards,
ARI Soft
