
Again about the title and description

Posted by olderman - 2014/04/26 11:18

Hello. I really liked the module, but I can't cope with the ini file. I posted two files with names coffee and bread in the folder. They appeared in the gallery but descriptions them not, though I did not change the ini file. Why?

Nothing change, the file doesn't exist. You can try to load it into a browser and see 404 error.

Documentation contains information that INI file should be located in folder with images.
