Images don\'t show
Posted by mdelrio - 2014/06/17 14:31
_____

I'm working in Joomla 2.5

The basis images don't show, but when you move the mouse over you can see like a link without image and then if you click it opens the image correctly.

I've tried to solve the problem reading here some other comments, but with no results.

-- Changing "cache" folder to 777
-- Putting "Load jQuery method" to Local

Nothing works...

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

Here you have one image capture, but you can't see much, only the controls right and left. http://www.ari-soft.com/images/fbfiles/images/CAPTURE.jpg

_____

It seems this is a problem with .htaccess file. If try to load a generated thumbnails into a browser, it try to load k2 component.

Regards,
ARI Soft

_____

Sorry, don't understand.

Is there any way to make it work?

_____

Check rules which are defined in .htaccess file for mod_rewrite Apache module.

Regards,
ARI Soft

_____

Fix rules for mod_rewrite.

Regards,
ARI Soft

_____

How? Which rules?

==

Re:Images don\'t show

_____

This is not "ARI Cloud Carousel" issue. Contact your site administrator or person who added rules for mod_rewrite to your .htaccess file so s/he fix it.

Regards,

ARI Soft

_____

He told me that he have the configuration by default for Joomla:

RewriteEngine On
RewriteBase /
RewriteRule ^index\.php$ -
RewriteCond %{REQUEST_FILENAME} !-f
RewriteCond %{REQUEST_FILENAME} !-d
RewriteRule . /index.php/es
