## FATAL ERROR

Posted by 2bcode - 2014/06/28 13:23

---

Having install ARI Cloud Carousael and Configured it from back end, the front end of my website show this error while trying to view it

Fatal error: Call to undefined method ArImageHelper::getImageDimension() in /hermes/bosnaweb01a/b2347/ipg.movingstuffscm/movingstuffs1/administrator/components/com\_arismartbook/kernel/Image/class.Thumbnail.php on line 137

Please what could be the cause of this?, and how can it be resolved?

---

Hello,

Download and upgrade the module. It should help.

Regards,  
ARI Soft

Thank you for your prompt, precise and concise. But i will like to know the module you asked me to download?

I had already downloaded and installed ARI Cloud Carousel, do i have to install another module before it can work?

Best of Regards
