
description .ini file not working at all

Posted by el_adri2020 - 2014/08/20 12:56

Hi there,

I am using your excellent module for some days but I cannot make work the descriptions and links. I've checked the forum and I think it is possible there is some conflict with my template but I'm not able to find it. I would like to see the title when I hover the icon, also a description and linking another image when I make click.

The carousel is here: <http://soulevent.loadingideas.com/>

and i've made an .ini file to make some test using the sample:

```
iconosindi.png="Planificar"  
coffee.jpg="Coffee"
```

```
iconosindi.png="Planificar"  
coffee.jpg="A cup of coffee"
```

```
iconosindi.png="/images/Aqua.001-001.jpeg"
```

Your help would be very appreciated.

Sorry for my english.
Regards

=====

Hello,

Send screenshot(s) of module settings page by email and specify path to a folder where images are located.

Regards,
ARI Soft
