
Images not showing

Posted by raunhar - 2014/09/19 07:13

Joomla 2.5x

URL:

<http://bachpanglobal.com/index.php/infrastructure.html>

&

<http://bachpanglobal.com/index.php/publications.html>

the image info shows location as: http://bachpanglobal.com/cache/acc_34ffbfbac6fd65d4601c875f2c088144_150_100.jpg

In the module I have set the image folder as: images/ani/

then the image folder and names.

This problem occurs, when I use the option under Maintenance--Clear Cache.

The .htaccess file is the default joomla file with :`## Mod_rewrite in use.`

Please suggest.

Hello,

How we can reproduce the problem?

Regards,

ARI Soft

currently, the images are showing.

will update the ticket, when the problem arises again.
