Title/Description not showing up
Posted by Internaut - 2014/10/23 00:45

_____

Integrated Pro version with Ari Sexy Lightbox.

Description path points to images/caro (location of images and caro.ini)

ini file example line is:

caro1="Past President of Washington District Chamber of Commerce"
caro2="more stuff ...."

caro1="Past President"
caro2="more"

I have set both mods to use this one ini.

rustyensign.ca and bottom right of screen

i

_____

Hello,

The page doesn't contain carousel module. We see only "ARI Image Slider" module. BTW, INI file should contain file name with file extension. For example image1.jpg. See the sample INI file for more details (link to sample INI file can be found in "Description" section on module settings page).

Regards,
ARI Soft
