
Stop rotation on mouse action --> YES

Posted by ravee1010 - 2014/11/13 23:04

Hello Team,

Fantastic Product but the issue is when I set Stop rotation on mouse action if this parameter is set to 'Yes', auto-rotate is not disabled on mouse click and over

I read the complete documentation from the below URL and I think it is bug in the latest version as auto rotate does not stop :(

http://www.ari-soft.com/docs/arismartcontent/v2/html/ARI_Smart_Content_UserGuide.html?CloudCarouselmodule.html

I hope you solve this ASAP. Thanks in advance

Regards

Hello,

Rotation is paused on mouse over and starts again on mouse out.

Regards,
ARI Soft
