link don\'t work for images
Posted by zagrosrayan - 2015/01/20 06:59

_____

hello
i'm newest memmmber of forum.
i have problem with link for images

myfile is :

04.png="HESAM"

04.png="BREAD"

04.png="http://www.mysite.com/?_target=_blank"

But don't work,propreties is attached.

_____

Hello,

Send a link to a page where you use the carousel and a link to INI file.

Regards,
ARI Soft

_____

hello,
excuse me i didn't understand that how active linke
myfile "*aricloudcarousel.ini" is in modual folder is that true ?
and my propreties is:
Description file: aricloudcarousel.ini
Number of images:4
Image path:
images/04.png
images/01.png
images/03.png
images/02.png

_____

I got it , Ring my bells :D
 i changed aricloudcarousel.ini in folder images
so mylink is true now,
(i'm irani so i didn't understand your response) tanks a milion...

_____

I'm having a similar issue. I changed my INI file and copied it to the aricloudcarousel.ini folder and my carouself folder and it is still not linking to the correct page. I only have 6 thumbnails in my carousel and this is basically what I have in the ini file

jpeg.png="www.mysite.com/jpeg page" (5 more times with different names and different page names to correspond to each thumbnail. Obviously I am doing something wrong or missing the boat completely. Thanks in advance

_____

aricloudcarousel.ini is not a folder name, this name of the file. It should be located in folder with images. If it doesn't help, send a link to a page where the problem occurs and screenshot(s) of module settings page by email so we can investigate the problem.

Regards,
ARI Soft

_____

Ok, My aricloudcarousel.ini file is under the install folder...not inside any other folder. I have attached the aricloudcarousel.ini file for you to look at.

On the site, I have the following settings:
Description file: aricloudcarousel.ini
Imagepath: images/Carousel_Pix   (a file I made to hold the logos in.)

There at 7 png's in the Carousel_Pix folder only...nothing else.
There are more than 40 png related images in the aricloudcarousel folder...nothing else.

The carousel is great, looks great, runs smooth. My client wants the ability to click on an icon/thumbnail and it redirect to the page on their site that houses the information pertaining to the particular icon/thumbnail. It has to be something I am doing or have done wrong...is it in the ini file or where?
