
One link for all images

Posted by surcl1 - 2015/08/18 14:25

Hello,

I know that is not normal use, but I would like to know if it's simply possible to make the same link for all images of carousel.

The actually .ini file is not the solution because i have 300 images.... (random image)

Do you have a solution ?

Thank you

=====

Hello,

ARI Cloud Carousel Pro supports ability to set a default link which will be used for images if another link is not defined in INI file.

Regards,
ARI Soft
