Width settings

Posted by raunhar - 2015/09/01 11:54

_____

URL:
http://leatherfactory.in/index.php

The carousel is getting cropped from left.

When the mouse is on the image, the lightbox is not working.

Please suggest

_____

Hello,

Add the following CSS rule to "CSS Styles" parameter:

.ari-cloud-carousel {overflow:visible!important}

It seems the carousel is moved to left due to "Y pos", "X pos", "Y radius" and "X radius" parameters are set manually and according to values of these parameters the carousel is shifted.

What value is selected in "Lightbox integration" parameter?

Regards,
ARI Soft

_____

"Y pos" 100
"X pos" 250
"Y radius" 250
"X radius: 285

Core Joomla Lightbox has been selected now.

_____

1. Could you provide a temporary access to your J! backend by email so we can investigate the problem with lightbox integration?

2. "CSS Styles" parameter in module settings.

Regards,

ARI Soft
