JFolder: :files: Path is not a folder

Posted by Osprey@ADM - 2015/09/23 13:31

_____

OK. This is another first for me. My boss is wanting to go live with our Joomla site and I am still fussing with this error. It is not showing any slides but is showing the arrow icons. Again, I am new to this so please be gentle. I have tried the www. link, I have tried /Carousel_Pix, I have tried /Carousel_Pix....the list is rather long and none of it is working. Please advise

_____

Hello,

If images are located in /images/Carousel_Pix folder, populate "Image path" parameter in module settings with images/Carousel_Pix value.

Regards,
ARI Soft
