
is there a way to run 2 carousels in 1 window

Posted by pixelschupser - 2015/10/14 06:44

good morning support.

is there a way to run two carousel windows with different pictures in one joomla window?

I can only run the same pictures in one window in 2 different carousels.

you can have a look at www.b-em.de > referenzen, there i want to have 2 carousels while i have more and more references to build up.

and whats with more carousels than 2 in the same window ?

kind regards

Hansjörg Lauble

Hello,

It is possible to create as many module instances as you want. This is a standard Joomla! feature. Use "New" or "Duplicate" button on "Extensions -> Modules" page on Joomla! backend.

hello Support

there is no module number as in "ari image slide show" to handle this problem in carousel. I have created this morning a duplicate from my "ari references carousel module" then i have done a copy in the references side and i have one carousel on top and one on the bottom, but it's the same as on top, not a different one from the folder /images/referenzen and /images/referenzen1. i want to show the 2 different directories in 2 different carousels in only one window of joomla.

kind regards

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,

ARI Soft

hello support

thanks for your help.

it's very asy to work with you.
It's now running perfectly

kind regards
Hansjörg Lauble :) :) :)
