_____

I have looked everywhere for documentation on the aricloudcarousel.ini file. Please can someone point me in the right direction.

_____

Hello,

Sample INI file and tutorial how to use it is available in "Description" section on module settings page.

Regards,
ARI Soft

Thanks for the reply, but I purchased the ARI Smart Content component and it took awhile to figure out that the file for the carousel is a csv file configured in the data area. All the discussions on the ini file here made this confusing and apparently the modules are different (Description section not the same) if you use the Smart Content component. I do have it working now and again thanks for the reply.

_____

Hello,

If you "ARI Smart Content - Cloud Carousel" application, it shows images based on selected data source. If data source for local images is used then title and descriptions are located in CSV file in folder with images. You can read more about it here, see description of "Description file" parameter.

Regards,
ARI Soft
