ARI Cloud Carousel Link with content in lightbox

Posted by Windoofer0815 - 2016/02/15 11:42

_____

Hello all together!

I use the the aricloudcarousel pro and I have a question. For the first: my english is'nt the best, but I hope you understand - thanks.

Is it possilble to klick on a picture in the carousel and them open a little article in a lightbox? If I wanna use the "lightbox intergration", the Module is position fix and on top of the site, that's why I deactivated this.
Normaly I use the JCE-Lightbox, but I do'nt know, how I create a link to open this.

Any ideas? Thanks a lot,
Windoofer0815 from nothern germany

PS: my site (under construction) http://www.new.augen-und-optic.de look at "SIE"

_____

Hello,

It is possible to define links for images in INI file. Link to sample INI file and description how to use it are available in "Description" section on module settings page.

If some problem occurs with a lightbox from "Lightbox integration" parameters section, it can be a conflict with a 3rd party extension or site template styles. We can investigate it if provide a link to a page where the problem occurs. You can send a link by email.

Regards,
ARI Soft

Hello ARI Soft,

thanks for your answer!
admin wrote:
Hello,
it is possible to define links for images in INI file.
Yes, I know that is possible for images - with a standart link like this in your INI- description. Also I know some threads with "custom link target" for instance to open in a frame, but i do'nt know what must do.
Thanks, if you want to look at my backend, to find the issure, why I can't use the lightbox integration. I think it is the template-code. I'll send you a mail.

Once more: I want to click on a picture in the carousel and than open a lightbox window with text - that's all. I hope you Know, what I mean.

Thank you, for your help!
Best regards

PS: For information: I'll set the site on offline now!

Check your mail please.

BTW, it is not possible to define a text which will be shown into the lightbox in INI file. It is only possible to enter links (for example to some articles, external pages or images). Titles and descriptions from and sections can be shown directly on the carousel.

Regards,
ARI Soft

_____

Hello!

"for example to some articles ..." - Ok, that's what I want. What should I do? Have you an example-link or is it the same, like an internal Link from article to article?

Best regards

_____

A link to an article looks like:

index.php?option=com_content&view=article&id=ARTICLEID&tmpl=component

Where ARTICLEID is ID of article which you want to show. For example for article with ID = 17, the link will be:

index.php?option=com_content&view=article&id=17&tmpl=component

_____

Oh so sorry. I make a mistake: please take *AuO.... instead of *AundO.... (O is not zero, is the letter "O")

Thanks and sorry.

_____

Hello ARI Soft!

Yes it works with the link like:
index.php?option=com_content&view=article&id=XX&Itemid=XXX

Then the article is shown on the content-area (instead "PARTNER") in a new window -> new window is ok, cause I set this in the modul-settings.

I think about a link like:
index.php?option=com_content&view=article&id=XX&Itemid=XXX" target="_blank" type="text/html" class="jcepopup noicon" title="text" data-mediabox-width="800" data-mediabox-height="600"

What you mean, is this possible in a INI-file?

Regards,
Windoofer0815

_____

Set "Lightbox integration -> Lightbox integration" parameter to "Core Joomla! lightbox" value. In this case links will be opened in default Joomla! lightbox.

The extension doesn't support integration with JCE popup, it requires custom modification of the extension.

Hello and thanks for your information, but:

admin wrote:
Set "Lightbox integration -> Lightbox integration" parameter to "Core Joomla! lightbox" value. In this case links will be opened in default Joomla! lightbox.

Windoofer0815 wrote in his first post:
If I wanna use the "lightbox integration", but the Module is on position fix and on top of the site, that's why I deactivated this.

That's why I've send you a mail with please to searching for the reasons.

Best regards,
Windoofer0815
