New Joomla 3.5 update and ARI
Posted by ADMadmin - 2016/03/30 14:29
_____

I have gotten the following error on 2 sites now after trying to upgrade my Joomla sites:

Fatal error: Using $this when not in object context in /home/ccacadmin/public_html/libraries/joomla/filter/input.php on line 233

Now, this relates to ARI because the only thing these 2 sites have in common is the Carousel. I'm not getting much help on the Joomla forum and am growing more and more frustrated as I have more sites to upgrade. Any ideas or advice?

Hello,

Update the module to the latest version.

Regards,
ARI Soft

Problem solved. A gentleman on Joomla told me how to fix. Reinstalled carousel and the site is working fine. Love your products!!!

Hello, where can I update the module. I've purchased and use the ARI Cloud Carousel Pro with the same issue after joomla3.5 update.

Thanks for your response

Hello,

The latest versions of purchased extensions are available in "Member Area".

Regards,
ARI Soft
