
installalation carousel pro over carousel

Posted by dnederveld - 2016/10/25 08:38

I did a lot of work to prepare pages with "ari carousel".
Now I installed "ari carousel pro". As I have seen on the configuration page the parameters are still the same but the carousel is not shown.
What to do?

Hello,

Could you provide a link to a page where the problem occurs?

Download the module again and update it on your site. After this clean browser's cache. It should help to resolve the problem.

The same version is installed. Could you provide a temporary access to your J! backend by email and we will install the latest version?

I uninstalled all ARI Products and installed new, no changes.
Then I made a clean Joomla Installation only with my Template and ari cloud carousel pro and ari sexi lightbox.
Here is the link:

<http://j364.delverden.de/index.php/test-ari-carousel-pro>

There you find also the parameters:

But it does not work in this <http://grabmale.delverden.de/index.php/bilderdarsteungen/ari-cloud-carousel>

temporary access: <http://grabmale.delverden.de/administrator>
User: ari
Password: arisupport

"Image path" parameter in module settings is empty so the carousel doesn't contain images.

Sorry, when I installed "pro" over "free", I checked only the first parameters and was astonished, that they where preserved.
may be i deleted the path before.

Thanks again
