
Link not working

Posted by MatzyG - 2016/12/02 19:05

Hello,

I just succeeded in creating a carousel on my website, using the following description file:

```
"File","Title","Description","Link"  
"praxis.jpg","Heilpraxis Wachenroth","Ihre Heilpraxis in Wachenroth","http://www.heilpraxis-wachenroth.de/"  
"seelenreise.jpg","Ihre Seelenreise","Seelenreisen","http://www.ihre-seelenseise.de/"  
"sia.jpg","SIA-Ausbildung","Systemisch Integrationsarbeit","http://www.sia-ausbildung.de/"
```

On the (construction-)website it is almost running...

Klick

There is even shown the link in the status bar of the browser, when I move over the image. But when I click on it it is not working! Right-click - "open in new tab" is working, but this is not my intention.

Can anybody help me?

Sincerely,
Matthias

Hello,

Set "Bring to front" parameter to "No" in module settings.

Regards,
ARI Soft

It works!
Thank you!

Matthias
