Link not working

Posted by MatzyG - 2016/12/02 19:05

_____

Hello,

I just suceeded in creating a carousel on my website, using the following description file:

"File","Title","Description","Link"
"praxis.jpg","Heilpraxis Wachenroth","Ihre Heilpraxis in Wachenroth","http://www.heilpraxis-wachenroth.de/"
"seelenreise.jpg","Ihre Seelenreise","Seelenreisen","http://www.ihre-seelenseise.de/"
"sia.jpg","SIA-Ausbildung","Systemisch Integrationsarbeit","http://www.sia-ausbildung.de/"

On the (construction-)website it is almost running...
Klick

There is even shown the link in the status bar of the browser, when I move over the image. But when I click on it it is not working! Right-click - "open in new tab" is working, but this is not my intention.

Can anybody help me?

Sincerely,
Matthias

_____

Hello,

Set "Bring to front" parameter to "No" in module settings.

Regards,
ARI Soft

_____

It works!
Thank you!

Matthias
