ARI Cloud Carousel

Posted by Mogwai - 2017/02/10 17:27

_____

Hi,

I would like to know if I can have the cloud carousel working in an article, and if so - how? I am going through the forum for some time now, but I did not find the solution.
I got the modul running, everything works well, so far really great. I could also make the .ini file working for the language with title, descriptions and links. But before going ahead to the english version and other pages, I would like to know if it makes sense to continue.

Here is my first try, but I hate that the content is down below the carousel. Unfortunately the template I use has no positon "content": Test page

Maybe someone can help me - with a description for a dummy as I am not at all good with .ini, .css, etc files. Thank you very much in advance.

Regards
Mogwai

_____

Hello,

If you want to embed a module into an article, "Content - Load Modules" standard Joomla! plugin can be used for this purpose. It is also possible to use "Modules Anywhere" or "Module Plant" 3rd party plugin.

Thanks a lot. It works :) I could also manage to change the color of the nav buttons. Now I wait that I get the ARI Smart Content (it's paid but I don't know how I am going to get it) to activate the fancy box.

Great support, great products!!!

_____

"ARI Smart Content" contains "ARI Smart Content - Cloud Carousel" module. It supports all features of "ARI Cloud Carousel" module and it is responsive. Just select a lightbox in "Lightbox integration" drop-down to integrate it with the lightbox. If want to integrate it with "ARI Smart Content - Fancybox" plugin, check that "ARI Smart Content - Fancybox" and "ARI Smart Content - Integration - Fancybox" plugins are enabled.

Regards,
ARI Soft
